

Polaris Library Systems Build Report through 5.0.191

Build	Public Summary
5.0.1	Mobile PAC: Any patron user-defined drop-down list box field set to display in MPAC did not do so. The default value was missing. This has been corrected.
5.0.1	Find Tool (Patron): There were problems with retrieving patron records whose free text block contained exclamation marks (e.g. !!!)
5.0.1	Mobile PAC: The 'Update Preferences' language string was missing from WebAdmin. It has been added.
5.0.1	Mobile PAC: The MPAC was not honoring the SA Policy table 'Patron Block Descriptions' where blocks are set to *not* display in PAC. This has been corrected.
5.0.24	Reports: When saving the Fines & Fees Credit Card Payment report to an Excel file, the margins and page numbering are no longer incorrect.
5.0.27	NCIP: 1. The NCIP Service now uses a logging system where a log file is created everyday.2. When a server is rebooted, the NCIP service is now automatically restarted.
5.0.32	Circulation (Holds): Unlocked hold requests that were created and set to Not-supplied (and given an activation date in the future) were going from Not-supplied to Inactive, and then to Active. Now unlocked requests will remain Not-supplied.
5.0.113	Acquisitions/Patron Services: When a Canadian address was copied or edited, the system incorrectly assumed that a space between the first and second section of the six character postal code indicated a zip+4. This has been fixed.
5.0.114	Circulation - Holds - Pending Hold Request is not deleted if linked patron record is deleted. This problem has been fixed.
5.0.141	System Admin (Notifications SA dialog, Fines tab): When the address type was 'Use optional address', the organization added to the combo box was not being saved correctly. This has been fixed.
5.0.162	Mobile PAC econtent: In some cases, integrated 3M econtent titles were appearing as "on order" when in fact, all copies of the title had expired. This problem was introduced in 4.1R2 build 1439 and in Mobile PAC only; it does not exist in earlier releases or in any releases of PowerPAC.
5.0.169	Reports (Public Services): Transactions for deleted patrons were not being calculated for Financial Transaction Summary by Fee Reason and Financial Transaction Summary by Payment Type reports. This has been corrected.
5.0.172	Community Profiles: The SA setting for the number of days after the event end date to continue showing the event in PAC was not being correctly honored in some cases. This problem has been fixed.
5.0.187	Saved title lists (patron account, PowerPAC): Saved title lists with a large number of titles sometimes fail to open, or open with errors. To prevent this problem going forward, saved title lists are now limited to 1000 titles, and appropriate messaging has been added to PowerPAC when the patron tries to add more than that. Existing saved title lists with more than 1000 titles are not affected.
5.0.190	Saved title lists (patron account, Mobile PAC): Saved title lists with a large number of titles sometimes fail to open, or open with errors. To prevent this problem going forward, saved title lists are now limited to 1000 titles, and appropriate messaging has been added to Mobile PAC when the patron tries to add more than that. Existing saved title lists with more than 1000 titles are not affected.
5.0.191	MARC Updates: This build includes changes to the bibliographic and authority validation tables for MARC Update No. 18 (April 2014) and MARC Update No. 19 (October 2014) and Technical Notices from June, July, September and October 2014.
