Polaris 6.6 Build Report

Issue key	Fix Version	Public Summary	NetSuite Id
POL-8419	6.6	Automatic Offline: The process no longer fails if a single workstation is inaccessible. It will now skip the workstation in question and continue to the next workstation.	27887922
POL-9063	6.6	Holds: Addresses an issue with items set to "Patrons from this library and branches" were filling requests for other branches.	29901709
POL-7757	6.6	Holds: Newly added items were not being checked against the patron's material type limits and therefore becoming available to fill hold requests. Newly added items will now display a blue "x" in the hold request if the patron was over their material type limit when the item was added.	25811357
POL-6732	6.6	INN-Reach: Hold Requests to Fill report no longer returns an error when a serial title and designation are over 255 characters.	19997341
POL-8508	6.6	INN-Reach: Messages no longer fail to process when the title contains a backslash.	28318414
POL-8652	6.6	Leap Offline: Circulations to patrons that do not exist will be displayed as errors instead of warnings in the Leap Offline logs.	28971480
POL-8783	6.6	Leap: Missing part check in is no longer referencing the previous borrower when the previous borrower has a fine balance for the title being checked in.	29385644
POL-9095	6.6	Leap: Searching for patrons by legal name fields now returns the correct number of results.	29953873
POL-8883	6.6	Leap: Staff members are no longer blocked from conducting missing part check in when missing override claims permission. The claims permission is required if creating a missing part claim puts the patron over the claim threshold.	29475950
POL-8657	6.6	Leap: Suppressed notification options will display for patrons in Leap who have that notification option assigned.	29006481
POL-9166	6.6	Leap: When Leap is configured externally with IP restrictions, the correct external directory is now being used for images.	30052512
POL-8934	6.6	Notices: Exported fine notices now include the check-out date associated with the fine transaction.	
POL-9330	6.6	PAC/PAPI: Patrons are no longer blocked from creating requests when the available items are temporarily restricted for them based on delayed holds functionality.	30443073
POL-7696	6.6	PAPI: The Polaris API no longer returns an error when attempting to update email addresses containing a hyphen.	25574727
POL-8270	6.6	Reports: Request Time to Fill report has been updated so the average displayed when multiple branches are selected is a true average and not an average of averages.	27520115

POL-7860	6.6	Reports: Turnover Rate Report no longer includes items that are marked for deletion.	26289646
POL-8327	6.6	Staff Client: Addresses an issue where users without permission to modify the cataloging view on an item record could edit the pickup location after clicking refresh.	27684582
POL-8465	6.6	Staff Client: Item record barcodes no longer become editable to staff without permission after a specific record save workflow.	28134526
POL-7883	6.6	Staff Client: Patron bulk change now supports setting the patron notification option to none.	26377832
POL-8903	6.6	Staff Client: Users without permission were able to delete patrons from the patron status workform.	29505501
POL-8776	6.6	System Adminstration: Using a certain workflow to modify patron address types was resulting in an odd display order. This has been corrected.	29382821
