

[5.6 Bug Report \(JIRA\)](#)

Displaying **12** issues at **25/Sep/17 10:45 AM**.

Key	Fix Version/s	Public Summary	Netsuite Issue ID
POL-4843	5.6	Leap: Bib level requests where all of the items tied to the bib had volume information were not pending as expected. This has been fixed.	10096
POL-4660	5.6	Leap: When trying to place a hold from the patron record in Leap on a serial record, you have the option to select a specific item or any available item. The item search that pops up if you select first available copy doesn't display any item information. This has been fixed.	9995
POL-4787	5.6	NCIP: Patrons with no overdue items were being blocked if the Total Overdue value in system administration was set to zero. NCIP is now consistent with the staff client, and blocks patrons with more than the Total Overdue limit.	10053
POL-4385	5.6	Notices: Some titles were displaying twice on reminder notices. These titles are no longer duplicated.	9567
POL-5001	5.6	PAC: Updated ERMS to correct an issue with periodically crashing in the PAC.	10165
POL-4588	5.6	PAC: Canadian postal codes were being logged as USA in the database when patron's self-registered in PAC. The country is now being logged correctly.	9964
POL-4943	5.6	PAC: Patrons were unable to close the "Select Databases" modal when asked to login to access resources. This has been corrected.	10127
POL-3912	5.6	PAC: The default "Sort By" option was not being observed on the Keyword search page. The value being used was for the Quick search page.	9689
POL-4547	5.6	PAC: The notification delivery option for patrons was not being logged properly during self-registration. The default value was always being used, even if the patron changed their notification preference. This has been fixed.	9942
POL-4279	5.6	PAC: The pickup library drop-down menu was occasionally displaying suppressed branches when a request was created from a title list.	9860
POL-4568	5.6	PAPI: PatronMessagesGet call only returns unread messages, even when the query string parameter is not set to 1. This has been fixed.	9955
POL-4762	5.1 SP1, 5.5, 5.6	eContent: Updated the SQL job Custom 3M EContent Bib Cleanup as part of the cloudLibrary rebranding.	10030
